

FIT-OUT

Class 8 total finishing company and manufacturer

Beddeleem occupies a unique position in the construction sector: we are both a class 8 total finishing company and manufacturer of relocatable partitions, climate ceilings, doors and furniture. This combination is an added value for the customer.

As a finishing construction company, Beddeleem has more than 70 years of experience in the total interior design and finishing (fit-out) of office buildings, utility buildings, hospitals, residential and care centres, school buildings, workplaces, work environments, workspaces. For B2B as well as for national and European government institutions, in Belgium and Europe. In addition to finishing the building with a wide choice of ceiling and partition systems, we can also take care of the coordination of the various techniques and, as the icing on the cake, the final finishing with loose and fixed furniture.

One-stop-shop with a single point of contact

This one-stop-shop event offers you as a customer a whole range of advantages. For example, you have a single point of contact for the entire process from A to Z. We take care of the coordination of your project. Everything is under our management so that we can work out all the technical nodes ourselves. This ensures fewer unforeseen circumstances during installation on site.

Made-to-measure

In addition, the products can also be matched aesthetically. After all, many products are developed and produced by Beddeleem itself. Just think of the same paint colour and other various finishes within your project.

As a manufacturer, Beddeleem specialises in the design, production and installation of relocatable partitions, climate ceilings, door systems and project furniture. We offer a wide range of both standard and custom made products. Thanks to a modern and flexible machine park and an internal research and development department, Beddeleem can easily develop tailor-made concepts and products.

It's in our system...
