

JB CUSTOM

Custom made

Customers want unique products, tailored to their taste and budget. More than in any other branch of industry, this can be felt on the project market, where the architectural aspect likes to be highlighted with project specific realisations.

With JB CUSTOM, Beddeleem offers the appropriate service for the success of such projects.

Own R&D and production

In addition to a large amount of know-how, Beddeleem also continues to invest in extensive machinery. Vertical integration not only enables us to handle large-scale projects quickly. Thanks to our personal approach and our own engineering office, we can act quickly and flexibly when it concerns developing made-to-measure articles.
