have no fear of time

— JB ACCESSOIRES

A relocatable wall system naturally calls for relocatable accessories.

The JB 2000 relocatable partition wall is a modular, floor-to-ceiling partition with a steel structure and panels made in chipboard, steel-clad plasterboard or glass in an aluminium frame. All the accessories designed for this partition system are produced so that they do not damage the existing structure and can be easily moved at any time.

The JB 2000 partition design stands out for its clean lines and right angles. The accessories are designed to match the JB 2000 partition.

Browse through this catalogue and discover the ideal solution to all your needs.

07 — Magnetic wall strip

Steel strip with durable powder coating for hanging notes, photos, etc. using magnets. The strip met is 100 mm high and hangs between two wall panels. A number of strips can be hung alongside each other.

PRODUCT CODES
P01317 + LENGTH + RAL COULEUR

Example: P01317 900 9010

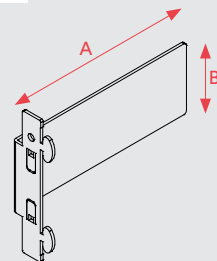

08 — Name plate

Name plate in steel with durable powder coating that can be hooked in the wall next to the door. This article is always made to order.

PRODUCT CODES
P01319 + Measurement A x Measurement B + RAL colour

Example: P01319 200x100 9010

09 — Clothes hook

Simple clothes hook in brushed stainless steel for screwing to a JB 2000 wall panel. Available in round or square version.

PRODUCT CODES
— Round: COAT HOOK I00712
— Square: COAT HOOK I00713

Example: COAT HOOK I00712

10 — Hook for stakes modules

Stainless steel hook for hanging between two stacked JB 2000 panels or window assembly. The hook is supplied with a PERLON cord and adjustable hanging hook. This adjustable hanging hook comes in two load capacities (7 and 15 kg).

PRODUCT CODES
— 7 kg: 884 + 226 + 224
— 15 kg: 884 + 226 + 225

Example: 884 226 224

11 — Coat hook

The coat hook has two arms with powder coating and two round tubes in brushed stainless steel. The coat hook is hung between two wall panels. Several coat hooks can only be fixed beside each other or connected to each other by means of a special bolt. Maximum load 25 kg.

PRODUCT CODES
P00800 + MODULE LENGTH + RAL COLOR ARMS

Example: P00800 1200 9010

12 — Hook JB2

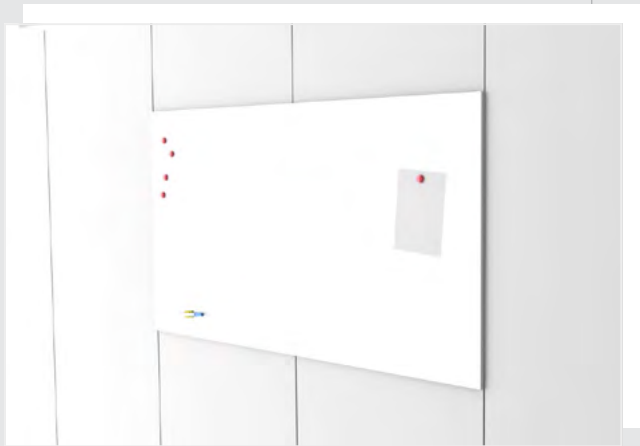

Hook for hanging between two panels, two window assemblies or by a door. Very simple and elegant. Is used as a hook for hanging clothing or as a coat hook (see photo)

PRODUCT CODES
P01320 = V065300 + COLOR

Example: V065300 9010

13 —
Whiteboard (steel)

Whiteboard to hang on a JB 2000 system partition. Useful during meetings or for hanging documents, photos, etc.

The board is hung between two wall panels. A number of whiteboards can be hung alongside each other. There is also a model that overlaps two wall panels, as shown in the photo above.

Max. dimensions 2400 × 1200 mm (width x height). Whiteboards can also be supplied with a holder (TRAY) for markers, etc. Whiteboards are only available in white.

PRODUCT CODES

- 1 module: P00858 + WIDTH X HEIGHT + TRAY (only if required)
- 2 modules (overlapping): P00858 + WIDTH X HEIGHT + TRAY (only if required)

Example: P00858 1200 × 900

14 —
Whiteboard (glass)

Whiteboard with glass for hanging on a JB 2000 system partition. Useful at meetings or for hanging documents, photos, etc.

The board is hung between two wall panels. A number of whiteboards can be hung alongside each other. Overlapping with several modules in one item on application. Max. dimensions 2400 × 1200 mm (width x height).

Whiteboards can also be supplied with a holder (TRAY) for markers, etc. Whiteboards are only available in white.

Note: use of glass board magnets is recommended

PRODUCT CODES

- 1 module: P01296 + WIDTH X HEIGHT + TRAY (only if required)
- 2 modules (overlapping): P01296 + WIDTH X HEIGHT + TRAY (only if required)

Example: P01296 1200 × 900

15 —
Whiteboard tray

The whiteboard tray is a handy marker ledge integrated into the whole. The tray is mechanically fixed to our whiteboards and has a durable powder coating. The tray extends across the full width of the board.

PRODUCT CODES

When ordering your whiteboard, add the TRAY code to your product code.. In this way, we will know at once what length to provide.
