B

**Our
imagination
just
needs
space**

— **JB Office**

With JB Office, Beddeleem gives the 'final touch' to your office space.

A team with years of experience sets out a concept appropriate within your company structure: the experience of your office.

Then, concepts are translated into products, colour and material usage, taking all of your wishes into account.

The range consists of the 4 pillars **WORK . STORE . SIT . FEEL** within which Beddeleem develops and produces a number of products such as desks, cabinets, lockers itself. Quality and ergonomics are the most important standards.

Visit our showroom in Nazareth for the necessary inspiration.

DESKS, WORK AND MEETING TABLES

Every work environment needs an adapted workplace. The JB DESK range from Beddeleem has a wide range of set-up options, can be used as a work and/or meeting table and offers a range of colouring, finishing and adjustment options (including sit-stand tables).

With the right WORK instruments, we offer you a varied, creative, communicative, innovative and ergonomic working environment.

Store .

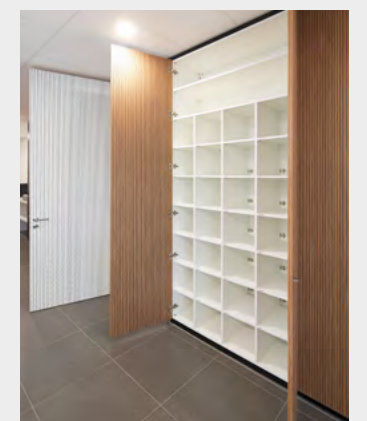

CABINETS & STORAGE FURNITURE

The storage of personal belongings, archiving, the organisation of a neat working environment... All this requires solid storage furniture.

Different options and finishing possibilities

The **JB STORE** cabinets from Beddeleem can be configured according to use, position in the room and offer numerous finishing possibilities. Hinged doors, sliding doors, lockers, mail boxes, drawer units, cloakroom cabinets, storage accessories and so much more are all among the options.

JB STORE ensures a neat and organised workplace. Thanks to an extensive choice of colours and materials, Beddeleem can adjust its full range to your chosen furniture or JB system partitions.

— JB LOCKERS

Store .

LOCKABLE CABINETS

On today's work floor, individually lockable lockers are indispensable, not only for storing personal belongings, but also for implementing a clean desk policy within the new way of working.

Our range of **JB LOCKERS** is an extension of our standard JB STORE cabinets. Locker doors with the same height are perfectly interchangeable, making it easy to play with different colours.

There is a choice between lockers that can be used individually by one person or consecutively by several individuals.

— SIT Brands

Sit .

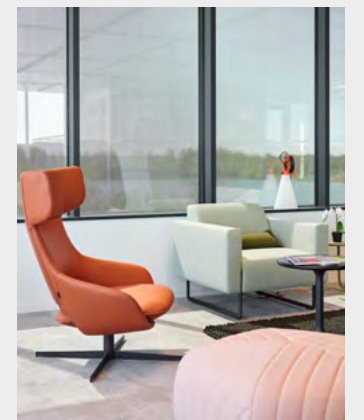

SEATING FURNITURE

Sitting is the least ergonomic position a person can adopt. Beddeleem also encourages people to deal with the subject of sitting differently in an office environment. For good sitting comfort, it is best to change your position regularly: sitting, standing, moving, ...

Beddeleem opts for a dynamic environment, where you can work alternately standing or sitting, where you need to take a short walk to reach the printer or the coffee corner.

When you furnish workplaces, meeting rooms, lounge areas where the subject of SIT inevitably arises, Beddeleem will look for the best approach to healthy sitting. Beddeleem cooperates with permanent partners and major brands.

The **SIT range** of Beddeleem is an extensive contemporary range of seating for your working environment : chairs, waiting furniture, office chairs, sofas, chairs, ...

ACOUSTIC SOLUTIONS

The **JB ABSORB** range of Beddeleem: maintenance-friendly, playful and decorative sound absorbing products. With attention to aesthetics in harmony with your project.

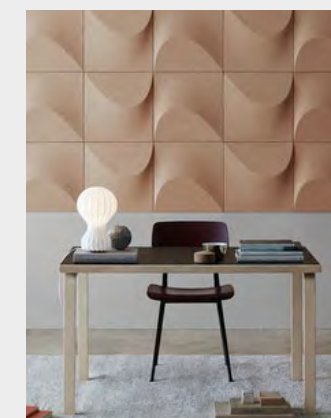

Loose absorbing elements

Products based on loose absorbent elements for walls, ceilings, floors,...

In today's building design, acoustics and the associated comfort must be considered. That is why Beddeleem offers with JB ABSORB a range of aesthetically pleasing products.

In harmony with your project

Sustainable materials and quality fabrics from well-known manufacturers were used in the development. The products use the same finishes as much as possible to maintain the harmony of your project. As always, we are happy to help you with your project and to tailor our products to your wishes.

LIGHT AND PRIVACY

A comfortable workplace does not end with comfortable furniture. Light and privacy are also important factors that are all too often ignored.

Various systems

With **JB BLINDS**, Beddeleem offers various systems such as roller blinds, stores with horizontal or vertical slats which can be integrated in our Beddeleem system partitions.

FLEX horizontal blinds

ROLL roller blinds

DRAPE curtains or vertical blinds

Mechanical as standard, electrically available as an option.

— JB FLORA

Feel .

The presence of greenery in the home or office always gives a soothing feeling.

Beddeleem offers with **JB FLORA** artificial plants with a true-to-life appearance.

All our artificial plants are firmly secured in a pot. Afterwards these are finished with a finish of your choice. Bark or carrara.

— JB PROTECT

Feel .

MAKING THE WORKPLACE SAFE AFTER COVID-19

As the lockdown came to an end, we wanted to return to our office workplaces safely and quickly, observing the rules for social distancing.

Ready-Made partitions

Lightweight, mobile and multifunctional partition which can be used to create separate areas within your office space, define routes to be taken and thus guaranteeing distancing at your offices.

Glazed protection screens

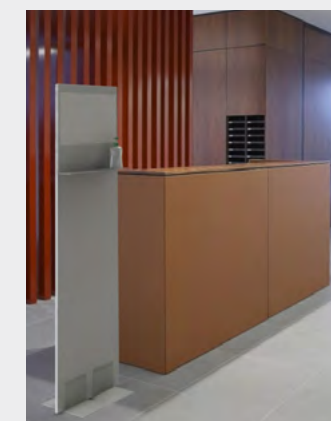

Structural solution for your reception area.

Transparent tabletop screens

Quick and easy to assemble lightweight construction with a range of fixing options.

Hands-free door opener

Open and close doors with your forearm instead of your hand.

— FEEL Brands

Feel .

Office styling: products for a feel-good work environment

The term FEEL includes the feeling, atmosphere, furnishing, image, experience and perception of your office. This aspect is essential to the well-being of your personnel and for attracting new staff: creating a feel-good work environment where people meet each other every single day.

Accessories and lighting for the final finish of your office

Beddeleem, along with a number of prominent partners, helps you to find the matching accessories and lighting.

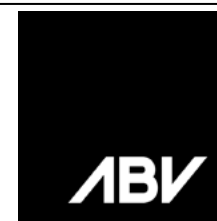

Visit our showroom in Nazareth for the necessary inspiration in office design.

Unite & combine —

CUSTOM MADE

Customers want unique products, tailored to their taste and budget. More than in any other branch of industry, this can be felt on the project market, where the architectural aspect likes to be highlighted with project specific realisations.

With **JB CUSTOM**, Beddeleem offers the appropriate service for the success of such projects. Coffee corners, kitchenettes, counter furniture,...

These made-to-measure items can be tailored specifically to your project, not only in terms of dimensions but also in terms of choice of materials.

Beddeleem designs and produces convector enclosures tailored to your project. **JB CUSTOM** convector casings are ideal for covering several techniques in one unit and for aesthetically concealing them.

Thanks to their specific construction, they can be quickly opened for maintenance. The casing is constructed from metal or wood panels on a steel structure with a durable powder coating.

Own R&D and production

In addition to a large amount of know-how, Beddeleem also continues to invest in extensive machinery. Vertical integration not only enables us to handle large-scale projects quickly; thanks to our personal approach and our own engineering office, we can also act quickly and flexibly when it concerns developing made-to-measure articles.
